Errata Change Notice

Pediatric Advanced Life Support (PALS) Provider Manual

ISBN:978-1-988892-90-0 RE6210E

Page #	Location	Original Text	Change	When Change Was Made	Notes
ii - xi	Contents (Table of Contents)	Page Number errors in Table of Contents	All associated pages in the PALS Provider Manual Table of Contents were miss numbered on print copy. A corrected PDF version of the Table of Contents with corrected numbers has been posted to the Heart Shop to download.	July 25 2022	Digital copy of corrected Table of Contents can be downloaded and printed. Changes will be made at next print.

Contents

Part 1	
Course Overview	1
<hr/>	
Course Objectives	1
Goal of the PALS Provider Course	1
Learning Objectives	1
Course Description	2
Precourse Preparation	5
Precourse Self-Assessment and Precourse Work	5
BLS Skills	5
ECG Rhythm Identification	6
Basic Pharmacology	6
Practical Application of Knowledge to Clinical Scenarios	6
Course Materials	7
<i>PALS Provider Manual</i>	7
PALS Reference Card	7
PALS Student Resources	8
Course Completion Requirements	9
Science Update	10
Major Science Changes in 2020	10
Respiratory Rate	10
Cuffed Endotracheal Tubes	10
Cricoid Pressure	11
Early Epinephrine	11
Diastolic Blood Pressure to Guide CPR	11
Seizures After Cardiac Arrest	11
Septic Shock	11
Opioid Overdose	11
The Chain of Survival	12
Overview	12
Chain of Survival Elements	13

Part 2	
Review of BLS and AED for Infants and Children	15
<hr/>	
Learning Objectives	15
BLS for Infants and Children	16
Pediatric BLS Algorithm for Healthcare Providers—Single Rescuer	16
Infant and Child 1-Rescuer BLS Sequence	17
Infant/Child Chest Compressions	20
Infant/Child Breaths	22
Pediatric BLS Algorithm for Healthcare Providers—2 or More Rescuers	23
Infant and Child 2-Rescuer BLS Sequence	23
AED for Infants and Children Younger Than 8 Years	26
Be Familiar With the AED Equipment in Your Setting	26
Delivering a Pediatric Shock Dose	26
Choosing and Placing the AED Pads	26
Using an AED for Infants	28
Part 3	
High-Performance Teams	29
<hr/>	
High-Performance Team Roles and Dynamics	31
Roles in a High-Performance Team	31
Elements of Effective Team Dynamics as Part of a High-Performance Team	33
Part 4	
Systematic Approach to the Seriously Ill or Injured Child	39
<hr/>	
Learning Objective	39
Initial Assessment to Identify a Life-Threatening Condition	39
Identify a Life-Threatening Condition and Act	40
Initial Assessment	42
Appearance	42
Breathing	42
Circulation (Colour)	43
Evaluate-Identify-Intervene	44
Evaluate	44
Identify	44
Intervene	45
Continuous Sequence	45

Primary Assessment	46
Airway	46
Breathing	47
Circulation	55
Disability	61
Exposure	65
Secondary Assessment	66
H's and T's	66
Focused History	66
Focused Physical Examination	67
Ongoing Reassessment	67
Diagnostic Assessments	68
Arterial Blood Gas	68
Venous Blood Gas	69
Capillary Blood Gas	69
Hemoglobin Concentration	70
Arterial Lactate	70
Invasive Arterial Pressure Monitoring	70
Near-Infrared Spectroscopy	71
Chest X-Ray	71
Electrocardiogram	71
Echocardiogram	71

Part 5

Recognizing and Managing Cardiac Arrest

Learning Objective	73
Rapidly Intervene to Prevent Cardiac Arrest	73
Life-Threatening Problems	75
Interventions	75
Cardiac Arrest in Infants and Children	75
Survival Rates From Pediatric Cardiac Arrest	76
Definition of Cardiac Arrest	76
Pathways to Cardiac Arrest	77
Hypoxic/Asphyxial Arrest	77
Sudden Cardiac Arrest	77
Causes of Cardiac Arrest	78
Identifying a Child at Risk for Cardiac Arrest	78

Recognizing Cardiac Arrest	79
Arrest Rhythms	79
Managing Cardiac Arrest	82
High-Quality CPR	82
Monitoring for CPR Quality	84
PALS in Cardiac Arrest	85
Pediatric Cardiac Arrest Algorithm	91
Part 6	
Effective High-Performance Team Dynamics	105
<hr/>	
Learning Objective	106
Roles in a High-Performance Team	106
Team Leader Role	106
Team Member Roles	106
Elements of Effective High-Performance Team Dynamics	107
Clear Roles and Responsibilities	107
Knowing Your Limitations	107
Constructive Interventions	107
Communication	108
Summarizing and Reevaluating	108
Part 7	
Recognizing Respiratory Distress and Failure	111
<hr/>	
Learning Objective	111
Fundamental Issues Associated With Respiratory Problems	112
Impaired Oxygenation and Ventilation in Respiratory Problems	112
Physiology of Respiratory Disease	115
Identifying Respiratory Problems by Severity	119
Respiratory Distress	119
Respiratory Failure	119
Auscultation With a Stethoscope	120
Identifying Respiratory Problems by Type	121
Upper Airway Obstruction	121
Lower Airway Obstruction	121
Airway Obstruction and Respiratory Rate	122
Lung Tissue Disease	122
Disordered Control of Breathing	123
Summary: Recognizing Respiratory Problems Flowchart	124

Part 8	
Managing Respiratory Distress and Failure	125
Learning Objective	125
Rescue Breathing	126
Respiratory Arrest	126
Rescue Breathing	126
Initial Management of Respiratory Distress and Failure	127
Principles of Targeted Management	128
Managing Upper Airway Obstruction	129
General Management of Upper Airway Obstruction	129
Specific Management of Upper Airway Obstruction by Etiology	130
Managing Lower Airway Obstruction	133
General Management of Lower Airway Obstruction	133
Specific Management of Lower Airway Obstruction by Etiology	133
Managing Lung Tissue Disease	136
General Management of Lung Tissue Disease	136
Specific Management of Lung Tissue Disease by Etiology	136
Managing Disordered Control of Breathing	139
General Management of Disordered Control of Breathing	139
Specific Management of Disordered Control of Breathing by Etiology	139
Summary: Managing Respiratory Emergencies Flowchart	143
Resources for Managing Respiratory Emergencies	144
Bag-Mask Ventilation	144
Suctioning	154
Oropharyngeal Airway	155
Oxygen Delivery Systems	157
Nebulizer	160
Metered-Dose Inhaler	162
Pulse Oximetry	163
Endotracheal Intubation	164

Part 9	
Recognizing Shock	167
<hr/>	
Learning Objective	167
Defining Shock	167
Pathophysiology of Shock	169
Components of Tissue Oxygen Delivery	169
Stroke Volume	170
Compensatory Mechanisms	171
Effect on Blood Pressure	172
Identifying Shock by Severity (Effect on Blood Pressure)	173
Compensated Shock	173
Hypotensive Shock	174
Identifying Shock by Type	176
Hypovolemic Shock	176
Distributive Shock	177
Cardiogenic Shock	182
Obstructive Shock	185
Recognizing Shock Flowchart	190
Part 10	
Managing Shock	191
<hr/>	
Learning Objective	191
Goals of Shock Management	191
Warning Signs	191
Fundamentals of Shock Management	192
Optimizing Oxygen Content of the Blood	192
Improving Volume and Distribution of Cardiac Output	192
Reducing Oxygen Demand	192
Correcting Metabolic Derangements	192
General Management of Shock	194
Components of General Management	194
Fluid Resuscitation	194
Summary: Initial Management Principles	200
Fluid Therapy	201
Isotonic Crystalloid Solutions	201
Colloid Solutions	201
Rate and Volume of Fluid Administration	201
Rapid Fluid Delivery	203

Frequently Reassess During Fluid Resuscitation	203
Indications for Administering Blood Products	204
Complications of Rapid Administration of Blood Products	204
Glucose	205
Glucose Monitoring	205
Diagnosing Hypoglycemia	205
Managing Hypoglycemia	206
Management According to Type of Shock	207
Managing Hypovolemic Shock	207
Managing Distributive Shock	212
Managing Septic Shock	212
Managing Anaphylactic Shock	218
Managing Neurogenic Shock	218
Managing Cardiogenic Shock	219
Managing Obstructive Shock	221
Managing Shock Flowchart	224
Resources for Managing Circulatory Emergencies	225
Intraosseous Access	225
Colour-Coded Length-Based Resuscitation Tape	229

Part 11

Recognizing Arrhythmias **231**

Learning Objective	231
Bradycardia Definitions	231
Recognizing Bradycardia	233
Signs and Symptoms of Bradycardia	233
ECG Characteristics of Bradycardia	233
Types of Bradyarrhythmias	233
Tachyarrhythmias	237
Recognizing Tachyarrhythmias	237
Effect on Cardiac Output	237
Classifying Tachycardia and Tachyarrhythmias	237

Part 12	
Managing Arrhythmias	245
<hr/>	
Learning Objective	245
Principles of Managing Pediatric Arrhythmias	245
Management: Pediatric Bradycardia With a Pulse	245
Medications	248
Consider Transthoracic/Transvenous Pacing	249
Identify and Treat Underlying Causes	249
Pulseless Arrest	250
Managing Tachyarrhythmias	251
Pulseless Arrest Initial Management Questions	251
Initial Management Priorities	251
Emergency Interventions	251
Summary of Emergency Interventions	258
Pediatric Tachycardia With a Pulse Algorithm	259
Pharmacologic Conversion	261
Part 13	
Post-Cardiac Arrest Care	263
<hr/>	
Learning Objective	263
Goals of Therapy	264
Primary Goals	264
Post-Cardiac Arrest Care Checklist	264
Respiratory System	266
Management Priorities	266
General Recommendations	266
Cardiovascular System	269
Management Priorities	269
General Recommendations	269
Treatment of Shock	272
Administer Maintenance Fluids	275
Neurologic System	277
Management Priorities	277
General Recommendations	277

Appendix	281
BLS Skills Testing Checklists	281
Child CPR and AED Skills Testing Checklist	282
Child CPR and AED Skills Testing Critical Skills Descriptors	283
Infant CPR Skills Testing Checklist	284
Infant CPR Skills Testing Critical Skills Descriptors	286
Initial Assessment—Pediatric Assessment Triangle*	287
Primary Assessment	288
Skills Station Competency Checklists	290
Airway Management Skills Station Competency Checklist	290
Rhythm Disturbances/Electrical Therapy Skills Station Competency Checklist	291
Vascular Access Skills Station Competency Checklist	291
Rhythm Recognition Review	292
Learning Station Competency Checklists and PALS Case Scenario Testing Checklists	296
Airway Management Skills Station Competency Checklist	297
Rhythm Disturbances/Electrical Therapy Skills Station Competency Checklist	298
Vascular Access Skills Station Competency Checklist	299
PALS Case Scenario Testing Checklists	300
Index	313
